

JAMES SIEJK

Senior Solutions Architect / Presales Engineer
jwsiejk@gmail.com | Boyertown, PA | .linkedin.com/in/james-siejk-b93a2481/

PROFESSIONAL SUMMARY

Senior presales and solutions engineer with 30+ years in enterprise infrastructure, supporting both customers and partners. I own the technical side of sales campaigns, delivering technical briefings and lab demos, architecting data center and cloud solutions, and leading solution verification and BOM reviews. Deep in storage and broader data center technologies, I qualify opportunities, position services, and step in when deals get complicated to drive a decision.

Presales & Solution Engineering · Solution Architecture
Data Center Infrastructure · Multi-Vendor Systems · Customer & Executive Engagement · Technical Discovery · BOM & SOW Development
Applied Generative AI · Cloud · SaaS · Storage · Partner & Channel Alignment · Enterprise & Mid-Market GTM Execution

PROFESSIONAL EXPERIENCE

Pure Storage — Partner Technical Manager / Senior Solutions Leader | 2018 – 2025

- Served as senior technical partner lead supporting national partners, acting as the primary technical enablement and escalation point.
- Built and validated POC environments in partner labs; delivered hands-on customer demos; ran partner workshops and enabled partner engineers through practical configuration and troubleshooting.
- Drove go-to-market alignment between Pure field teams, partners, and customers by simplifying messaging, positioning, and solution delivery.
- Led technical enablement across regions, translating platform capabilities into practical, customer-ready solutions.
- Acted as trusted advisor to partner engineers and leadership, influencing architecture, customer strategy, and execution.
- Supported complex partner-led deals through architectural validation and technical confidence building.
- Built internal AI-driven tools to accelerate technical enablement and execution with a focus on real-world usability.

Dell / EMC — Unstructured Sales Specialist (Account Executive) | 2017 – 2018

- Led end-to-end sales cycles for unstructured data solutions across assigned territory.
- Owned prospecting, qualification, pipeline development, forecasting, and deal closure.
- Partnered with presales and engineering teams to align customer needs with AI, analytics, and data platforms.
- Secured enterprise wins by translating business outcomes into measurable ROI.

Pure Storage — Presales Solutions Engineer | 2014 – 2017

- Member of the first Philadelphia Metro sales team, building the territory from inception.
- Partnered with account executives to drive rapid adoption and revenue growth.
- Led technical discovery, architecture design, proofs of concept, and customer presentations.
- Established Pure's credibility in a competitive, incumbent-heavy market.

Early Career — Technical Engineering & Professional Services | IBM, EMC, FirstUSA, United States Air Force

- Built foundational expertise in systems engineering, storage, server technologies, and enterprise delivery.
